Sustainability reporting guidelines:

### 3. DECLARATION OF CONTENTS

#### **Chemical content**

Enter chemical content for the whole article. The concentration is calculated at component level according to the principle of "once an article always an article". Is there classification of the article? Is there a safety data sheet for the article? Not applicable Not applicable For complex products, the concentration of included substances has Enter which version of the candidate list has been used (Year, month, day) been calculated at: whole construction product The article is covered by the RoHS Directive: Enter the weight of the article: No Enter how large a proportion of the material content has been declared [% 100 If the article contains nanomaterials deliberately added to obtain a particular function, enter these here: The product does not contain deliberately added nanomaterial Enter the proportion of volatile organic substances [g/litre], applies only Is the article registered in Basta? to sealants, paints, varnishes and adhesives: Yes Other information:

#### Article and/or sub-components

Phase	Delivery				
Component	Box side, resistance	, front plate	Weight% of product	:	
Comment					
Material	Substance	Concentration interval (%)	EG/CAS/Alternative designation	Candidate list	Phasing-out
	Galvanized steel	=99.29	EN 10346:2015		
Component	Color		Weight% of product		
Comment					
Material	Substance	Concentration interval (%)	EG/CAS/Alternative designation	Candidate list	Phasing-ou substance
	Barium Sulphate	=0.07	007727-43-7		
	Barium Sulphate Epoxy resin	=0.07 =0.13	007727-43-7 025036-25-3		
	·

	Steel	=0.43	CK15 / 1.1141		

### 4. RAW MATERIALS

#### Raw materials

Component	Material	Transport type
	Steel	Ship
Country of raw material extrac	tion	City of raw material extraction
Sweden		-
Country of manufacture/produ	ction	City of manufacture/production
Comment		
The steel raw material is produced at diff The sheet dimensions are then adjusted		y in the EU, according to the detailed specification of the current standard. vie.

#### Total recycled material in the article

Is recycled material included in the article?		
Material		
Steel		
Proportion after the consumer stage	Proportion before the consumer stag	Weight/percent by weight
100	0	20 %
Comment		
About 20% recycled material are being used in the	e production of steel.	
Material		
Aluminium		
Proportion after the consumer stage	Proportion before the consumer stag	Weight/percent by weight
39	61	57,9 %
Comment		
The amount of recycled aluminium varies dependi	ng on availability. Hence it can vary between 0 and	100%. All collected aluminium are being reused.

Material			
Stainless steel			
Proportion after the consumer stage	Proportion before	e the consumer stag	Weight/percent by weight
74,7	25,3		75 %
Comment			
About 75% recycled material are being used in the	production of stainless s	steel.	
Renewable material			
Enter proportion of renewable material in the article than 10 years):	e (short cycle, less	Enter proportion of reneration 10 years):	wable material in the article (long cycle, more than

Does not contain type of wood or origin in C	ITES appendix of endang	gered species	
The timber has been logged legally and the	re is certification for this		

#### 5. ENVIRONMENTAL IMPACT

#### Environmental impact during life cycle of the article, production phase module A1-A3 under EN

Has environmental product declaration been drawn up according	to EN 15804 or ISO 14025 for the article?
These product-specific rules, known as PCR, have been applied:	Registration number / ID number for EPD:
Climate impact (GWP100) [kg CO2-eq]:	Ozone depletion (ODP) [kg CFC 11-eq]:
Acidification (AP) [kg SO2-eq]:	Ground-level ozone (POCP) [kg ethene-eq]:
Eutrophication (EP) [kg (PO4)-3-eq]:	Renewable energy [MJ]:
Non-renewable energy [MJ]:	If calculation has been made in Green Guide, enter which rating:
If there is environmental product declaration or other life cycle assessm from a life cycle perspective:	ent, describe how the environmental impact of the article is taken into account
The information refer to "gate to gate", inflows (raw materials, inputs, er	nergy, etc.) for the registered product into the manufacturing unit, and outflows

Country of final manufature: Denmark or Czech Republic.

Energy used in the manufacture of the product: electricity 0,58 kWh per produced kilo.

Transport: <99% truck, deliveries to the customer/branch, <1% electric forklift.

Climate impact from internal tranports: CO2 0,0025 kg, CH4 <0,0001 kg and N20 <0,0001 kg.

Emissions to air, water or soil from the manufacture of the product, climate impact from operations: carbon dioxide equivalents (CO2-e) ≈ 1,5 kg per kilo product (Not included in Lindab carbon footprint study).

The production itself causes no emissions to air, water or land.

Residual products from the manufacture of the product: <30% steel scrap, 100% is recycled, waste code 17 04 05. <18% aluminium scrap, 100% is recycled, waste code 17 04 02. All waste is taken care of by a carrier with the necessary permits. No waste is exported.

For information about raw materials, distribution, waste etc., see the other sections.

#### 6. DISTRIBUTION

#### Distribution of finished article

Does the supplier apply any system with multiple-use packaging for the Does the supplier use Retursystem Byggpall? article? Yes Nο Does the supplier take back packaging for the article? Is the supplier affiliated to a system for product responsibility for packaging? No Yes If yes, which packaging and which system?

Other information:

Förpacknings & Tidningsinsamlingen

If possible products are packed together. The packaging materials include wood, cardboard, and plastic wrap. Wooden pallets are being reused. All packaging consists of recyclable material, the cardboard Lindab uses for packaging consist of 97,5% recycled material. Shipments of manufactured goods are mainly transported by truck to the customer/branch. The average transporting distance is <500 km.

# 7. CONSTRUCTION PHASE

#### **Construction phase**

8.

Does the article make special requirements in storage?	
Yes	
Specify	
To prevent soiling and oxidation, the product should be stored protected from the weather.  See Lindab's product catalogue for more information.  Does the article make special requirements for surrounding building products?	
No	
Specify	
Other information:	
USE PHASE	
Use phase	
Does the article make requirements for input materials for operation and maintenance?	
No	
Specify:	
Does the article require supply of energy during operation?	
No	
Specify:	
Estimated technical service life for the article:	
>50 years	
Comment:	
Lifetime depends on the environment where the product is being used. Corrosive environments can affect the life of the product negatively. There is a special instruction for the care of this product, see Lindab's product catalogue for more information. The product can be adapted to work with new tech.	
Is there energy labelling under the Energy Labelling Directive (2010/30/EU) for the article?  If yes, enter labelling (G to A, A+, A++, A+++):	
Not applicable	
Other information:	

# 9. DEMOLITION

#### **Demolition**

	Is the article prepared for disassembly (dismantling)?
	Yes
	Specify:
	The parts can easily be separated.
	Does the article require special measures for protection of health and environment in demolition/disassembly?
	No No
	Specify:
	Other information:
10	. WASTE MANAGEMENT
	Delivered article
	Is the supplied article covered by the Ordinance (2014:1075) on producer responsibility for electrical and electronic products when it becomes waste?
	No
	Is reuse possible for the whole or parts of the article when it becomes waste?
	Yes
	Specify:
	The entire product can be reused.
	Is material recovery possible for the whole or parts of the article when it becomes waste?
	Yes
	Specify:
	~99% of the material can be recycled.
	Is energy recovery possible for the whole or parts of the article when it becomes waste?
	Yes
	Specify:
	Heat recovery occurs at smelter.
	Does the supplier have restrictions and recommendation for re-use, material or energy recovery or landfilling?
	Yes
	Specify:
	Should be recycled according to recommended waste code.
	Waste code for the delivered article when it becomes waste
	170203 - 03 Plast.
	170402 - 02 Aluminium.
	170405 - 05 Järn och stål.
